PROFESSIONAL SUMMARY

Full Stack Developer with 6+ years of experience building scalable web applications and RESTful APIs using React, Next.js, TypeScript, Node.js, ExpressJS and NestJS. Experienced in designing responsive, high-performance applications, developing secure backend services, and optimizing application performance. Strong expertise in JavaScript, React, PostgreSQL, and AWS Cloud. Passionate about building user-focused solutions and collaborating with cross-functional teams to deliver high-quality application.

TECHNICAL SKILLS

Languages and Frameworks

JavaScript, TypeScript, React, Next.js, React Native, NestJS, HTML5, SASS, CSS3, Express.js, Tailwind, .NET

Database

MongoDB, MySQL, PostgreSQL

UI Libraries

Bootstrap, Ant Design, Material UI, Tailwind CSS

Devops & Tools

Docker, Git, Jenkins, Cypress, Postman

Cloud

AWS (EC2, S3, Lambda, RDS)

PROFESSIONAL EXPERIENCE

Software Engineer Level III, Fusemachines Nepal

2023 Jan – Present

- Developed and enhanced features for an AI-powered Learning Management System, working across frontend and backend using React, TypeScript, Node.js, and NestJS, including online examination and proctoring modules.
- Contributed to the architectural design and development of LMS features, designing scalable application flows, backend services, and RESTful APIs to support business requirements.
- Containerized applications and development environments using Docker, supporting consistent development and deployment workflows.
- Led and mentored junior engineers and interns, providing technical guidance, conducting code reviews, and promoting clean code and engineering best practices.
- Collaborated with senior engineers, product managers, and designers to translate business requirements into scalable features, optimize application performance, and maintain production-ready solutions.
- Leveraged AI-assisted development tools such as GitHub Copilot and Claude to accelerate development, improve code quality, and support debugging and code reviews.

Mid-Software Engineer, Asterdio Inc.

2021 Dec – 2023 Jan

- Built an online food delivery website and admin panel using the MERN stack.
- Developed responsive and user-friendly web applications using HTML, CSS, JavaScript, React, and Next.js ensuring that they are optimized for speed, accessibility, and performance.
- Managed and trained interns in frontend development tools and frameworks
- Developed mobile applications using React Native.

Software Engineer, Pro-mech Minds and Engineering Service

2020 Jan – 2021 Nov

- Built an e-commerce website and various web applications using HTML, CSS, JavaScript, React, and Express.js.
- Mobile app development using React native.
- Continuously researched and learned new technologies and best practices in frontend development.

PROJECT EXPERIENCE

Fuse LMS

- AI-powered Learning Management System enabling institutions to create and manage courses and programs, with dedicated workflows for learners and instructors.
- Developed and enhanced core LMS features including course/program management, learner and instructor workflows, online examinations, and proctoring.
- Contributed to the architecture and design of the platform, working across frontend, backend services, APIs, and database-driven features.
- Collaborated with engineering and product teams to build scalable, maintainable, and production-ready features, while troubleshooting and optimizing the application.

Technologies: React, TypeScript, Node.js, PostgreSQL, AWS, Docker

Upacare Health

- UpaCare is a web-based platform that enables users to book appointments with health professionals, making healthcare more accessible and streamlined.
- Developed and maintained web applications within a monorepo for doctors, admin, and organization admin.
- Integrated a Zoom video call feature that allows multiple users and an AI bot to participate in the session.
- Contributed to application architecture, performance optimization, debugging, and production-ready feature development.
- Built a dashboard for organizations to monitor healthcare professional activities, performance metrics, and appointment data.

Technologies used: React.js, NextJS, Nest Js, Amazon Cognito, PostgreSQL, SASS

BuyParts24

- An online platform to find spare parts for any make, models and versions of cars in UAE. The leading multi vendor marketplace for car parts in the region.
- Optimized and refactored existing codebase, developed and enhanced new features, integrated third-party APIs, and implemented various UI improvements.

Technologies used: React, Node Js(Express), MongoDB, Typescript

Tulikaa

- An online platform for artists and art lovers with E-commerce functionality, feed, chat feature recommendation.
- Developed and enhanced real-time chat functionality, including support for multiple user conversations using Socket.IO.
- Contributed to the implementation of core features such as feed and recommendations.

Technologies used: React, MongoDB, Express.js

Lance Camper

- Developed a mobile application using React Native, focusing on designing and implementing user interfaces and integrating RESTful APIs to enable efficient functionality

Technologies used: React Native, Laravel

CERTIFICATIONS

[AWS Certified Developer – Associate \(DVA-C02\) | Amazon Web Services \(AWS\) | 2026](#) 

SOFT SKILLS

Problem Solving, Communication, Team Collaboration, Leadership & Mentoring, Analytical Thinking, Time Management, Adaptability, Decision Making

EDUCATION

Bachelor of Computer Engineering,
Kathmandu Engineering College, IOE

2015 – 2019
